

# Oldcastle FRP

**Strength and Durability  
Carefully Crafted.**

## Crafted with **your needs in mind.**

Our unique hybrid process bonds strong, polymer concrete rings with high-impact resistant fiberglass sidewalls, forming a monolithic body. When Oldcastle FRP bodies are paired with polymer concrete covers, select units are suitable for light or heavy incidental traffic. Specifiers can meet expected load ratings while installers can handle and modify with ease.

**We utilize carefully crafted manufacturing methods to ensure we provide products with high-impact resistance and long-lasting durability.**

### Lightweight Design

The unique spray-up fiberglass manufacturing method paired with the polymer ring creates a strong, lightweight product.

### Strong

Strength and durability are key features. The reinforced fiberglass sidewalls are high-impact resistant, providing a superior solution to a common challenges.

### Easily Modifiable

Easily modified in the field with 18V power tools.

### Robust Offering

Offering a broad range of sizes and depths to provide the right product for your project.
